

## Uninstalling the Pharos Popup client and printers in Mac OS X

To uninstall the Pharos Popup client, open a Finder window and select “Macintosh HD” or your primary hard drive.

Select the “Library” folder.

Select the “Application Support” folder.

Select the “Pharos” folder.

Select the “Utilities” folder.

Double-click the “Uninstaller” application.

Place a check in the box labeled “Pharos Popup” and click *Continue*.

Click *Continue* again and provide the necessary administrator credentials if required.

Following the uninstallation, click *Done*. The Popup software is now uninstalled.

**Please note: Printers may need to be manually removed. Uninstalling the Popup software may not remove them.**

To remove Pharos printers, open *System Preferences* by clicking the Apple logo in the upper-left corner, then the “System Preferences” menu item.

Select “Print & Fax”.

From the list of printers in the menu on the left, select all Pharos printers by holding down the “command” key and clicking each printer.

Once all desired printers are highlighted, select the minus button below the list.

Confirm the removal by clicking *OK*.

The printers are now removed.
